### ♀ FESTIVAL VENUES

### European elections 23-26 may

### The Thistimeimvoting.eu campaign

The European elections on 23-26 May are probably the most important in the history of the European Union. For the first time, the idea of Europe and of the European Union as we have known it is at stake: the experiment of political integration that has brought peace and economic development to the Continent.

With the institutional campaign Thistimeimvoting.eu, the European Parliament and European Commission have decided to focus on young people, asking them to turn themselves into "activists" of the vote. The goal of each of these volunteers is to convince as many people as possible to go to the polls in May.

According to the latest figures, over two hundred thousand people are already registered on the Thistimeimvoting.eu platform, and Italy is the second country after Germany in terms of numbers of subscribers.

If we all vote, we all win!

## YOUTH ACTIVISM MASS MOBILIZATION THROUGH SOCIAL MEDIA

Having survived one of the worst mass shootings in America, students of Marjory Stoneman Douglas High School in Parkland, Florida, reacted immediately by mobilizing to prevent such an atrocity ever happening again. Through a smart use of social media they created the March For Our Lives movement to put pressure on politicians to change gun possession laws. After a March 2018 rally in Washington DC that was one of the biggest youth-led demonstrations since the Vietnam war era, they organized a tour across America to invite young people to register for the vote.

Jaclyn Corin and David Hogg, survivors of the Parkland mass shooting and among the founders of March For Our Lives, will talk about their experience, about how a mass movement can be created by using social media networks, and about the commitment of young people to really change things.
